There are also some characters with a macron or overline (straight line) above them. You may need to adjust your font settings for these to display properly. The many inconsistencies in hyphenation and use of accents and ligatures have been preserved as printed, with a few exceptions. Variable and archaic spelling has also been preserved. A full list of amendments and other notes follow the end of the book. A considerable number of the recipe and page numbers in the index are incorrect; however, they have been preserved as printed. The transcriber has, as far as possible, linked to the correct place in the text. Where the reference could not be determined, the numbers remain unlinked. The Greek titles of the ten books point to a common Greek origin, indicating that Apicius is a collection of Greek monographs on various branches of cookery, specialization such as highly developed civilizations would produce. Both the literary style and the contents of the books point to different authors, as may be seen from the very repetitions of and similarities in subjects as in VI and VIII , and in IX and X . Cum sit anus conjunx, cum sint tibi mortua membra Nil aliud, bulbis quam satur esse potes. We fail to find this quotation from Varro in his works, M. Teren. Varronis De Re Rustica, Lugduni, 1541, but we read in Columella and Pliny that the buds or shoots of reeds were called by some ?bulbs,? by others ?eyes,? and, remembering that these shoots make very desirable vegetables when properly cooked, we feel inclined to include these among the term ?bulbs.? Platina also adds the squill or sea onion to this category. Nonnus, p. 84, Diæteticon, Antwerp, 1645, quotes Columella as saying: Jam Magaris veniant genitalia semina Bulbi. WHEN DONE [retire the truffles] BIND [the liquor] WITH ROUX, DECORATE THE TRUFFLES NICELY AND SERVE [1]. [1] This formula clearly shows up the master Apicius. Truffles, among all earthly things, are the most delicate and most subtle in flavor. Only
